# Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kid neys are out of order

that it is not uncommon for a child to be born afflicted with weak kid nevs. If the child urin ates too often, if the

urine scalds the flesh or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made mis-erable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of Swamp-Root is soon realized. It is sold by druggists, in fifty-

y sterday inspected all the eleemosynary institutions. He was accompanied by Health Commissioner Starkhoff. They left the City Hall together at 2 o'clock and finished their work at 7.

They inspected each building from bottom to top, went through all the wards and rooms and collected much information concerning the condition of the structures. They visited the City Hospital, Insane Asylum, Poorhouse and Female Hospital.

All these buildings are inadequate to accommodate the inmates. They are overcrowded and sadly in need of repair. The only one of the buildings that is in good condition is the insane Asylum, and it holds only half the city's insane patients. In the Poorhouse hundreds of paupers and insane persons are huddled together.

The Mayor was pleased with the management of the institutions, considering the difficulties under which the superintendents are obliged to work. But he commented on the decayed state of nearly all the buildings, and expressed regret that the city is unable to do better for the unfortunate inmates.

# ANOTHER BIG DROP IN NEW JULY OATS.

Stuff They Can and Settle Privately for the Rest.

Chicago, Ill., July 28.-New July eats almost duplicated their drop of Saturday on change to-day. In the morning they sold port by the bull people or any but scat-

Dats closed at 67 cents Saturday. It looks as if the most interesting part of the next three days' developments in the eal will occur outside the pit-that shorts will deliver what cash stuff they can and

settle privately for the rest. The New York clique, which holds the bulk of the new July contracts, has removed its support from the local cash marcet, evidently thinking shorts can now get but a small part of the oats needed, and in consequence "spot" prices were lower. This and the big estimate of to-day's receipts helped the decline. The bulls are giving no support to the speculative price, it is thought, in order to make the country uncertain whether the "corner" still exists and thus perhaps cut down the receipts. A party of New York speculators is now ecredited with holding the majority of the July contracts, and the James A. Patten | be of no service, holding is supposed to be only a small part of the total of perhaps 2000,000 bushels. The Spanish had penetrated the Interior on a hunting trip. He noticed some birds of rare and curious plumage and, being anxious to secure a specimen, was led for several miles through the trails to a dense tropical growth. He came to a clearing in the center of which stood a neatly built hut. On a near-by tree, was resting one of the birds he sought. He took careful alm, fired and missed the bird. The sound of the explosion, however, alarmed the inhabitants of the but and, while looking in vain for the bird, the surgeon was surprised to see a white man and woman step out of the house, stare at him with frightened gaze and then run for the cover of the near-by thicket. He followed the fleeing pair, but, after a short chase, lost

their trail and returned to the hul Kidaaped Two Babies. Within, lying all unconscious of their parents' alarm, he found two boy bables, apparently twins. They had blue eyes, and such halr as they had was fair and straight. After walting several hours for the parents' return the surgeon decided to take posses-

ion of the twins. He took them to Spain, where he adopted them and brought them up as his own. One he educated as a lawyer; the other is to-day practicing medicine near Madrid. When the two boys reached manhood they were told the story of their babyhood. The lawyer expressed a desire to visit the scene of his birth, find his parents if alive and tell them of the great outside world; and, if possible, bring them to Spain.

He secured permission to make the jourey, and, armed with detalled directions from the surgeon, started out on a search
